

## WAFER STYLE KNIFE GATE VALVE

The **EX** model knife gate is an uni-directional wafer valve designed for general industrial service applications. The design of the body and seat assures non-clogging shut off on suspended solids in industries such as:

- Pulp and Paper
- Wastewater treatment plants
- Food and Beverage
- Mining
- Power plants
- Chemical plants
- Bulk handling
- etc.

**Sizes:** DN 50 to DN 1200 (larger diameters on request)

**Working pressure:**

DN 50 to DN 250:	10 kg/cm <sup>2</sup>
DN 300 to DN 400:	6 kg/cm <sup>2</sup>
DN 450:	5 kg/cm <sup>2</sup>
DN 500 to DN 600:	4 kg/cm <sup>2</sup>
DN 700 to DN 1200:	2 kg/cm <sup>2</sup>

**Standard flange connection:** DIN PN 10 and ANSI B16.5 (class 150)

**Note:** other flange connections are available on request such as:

DIN PN 6	DIN PN 16	DIN PN 25
BS "D" and "E"	ANSI 125	

**Directives:** DIR 98/37/CE (MACHINES)

DIR 97/23/CE (PED) Fluid: Group 1(b), 2 (Cat. I, mod. A)

DIR 94/9/CE (ATEX) Group II, Cat. 3: zones 2 and 22

All valves are tested prior to shipping in accordance with the standard developed by the Quality Control Department at ORBINOX.

### STANDARD PARTS LIST

Part:	Cast Iron:	Stainless Steel:
1- Body	GJL250 (GG25)	CF8M
2- Gate	AISI 304	AISI 316
3- Seat	Metal/Metal or EPDM	
4- Packing	Tallowed cotton	PTFE Impreg. Synth. Fibre
	(Both versions with a EPDM o-ring)	
5- Gland	Aluminium (DN 50 to DN 300) or Ductile Iron (DN 350 a DN 1000)	CF8M
6- Stem	AISI 303	
7- Stem nut	Brass	
8- Yoke	Epoxy-coated Carbon Steel	
9- Collar	Nylon	
10- "A" ring	AISI 304	AISI 316
11- Handwheel	$\phi \leq 310$ : Ductile Iron / $\phi \geq 410$ : GJL 250 (GG25)	
12- Cap	Plastic	
13- Stem Protector	Epoxy-coated Carbon Steel	
14- Friction washer	Brass	

## DESIGN FEATURES

### BODY:

Wafer style cast **monoblock** with raised face, with reinforced ribs in larger diameters for extra body strength.  
Internal cast-in gate wedges and guides allows for tighter shut-off.  
Full port design for greater flow capacity and minimal pressure drop.  
Internal design avoids any build up of solids that would prevent valve from closing.

### GATE:

Stainless steel gate as standard.  
Gate is polished on both sides to avoid jamming and seat damage.  
Bottom of the gate edge is machined to a bevel to cut through solids for a tighter seal in the closed position. On request: thickness and/or material of the gate can be changed for higher pressure requirement.

### SEAT: (resilient)

Unique design that mechanically locks the seat in the internal of the valve body with a stainless steel retainer ring.  
Standard EPDM also available in different materials such as Viton, PTFE, etc.

### PACKING:

Long-life packing with several layers of braided fibre plus an EPDM o-ring, with an easy access packing gland ensuring a tight seal.  
Long-life braided packing is available in a wide range of materials.

### STEM:

The standard stainless steel stem offers a long corrosion resistant life.  
For rising stem handwheel actuators only, a stem protector is provided for additional protection against dust while the valve is in the open position.

### ACTUATORS:

All actuators supplied by **ORBINOX** are interchangeable, and supplied with an standard mounting kit to allow for installation on site.

### YOKE or ACTUATOR SUPPORT:

Made of EPOXY coated steel (stainless steel available on request).  
Compact design makes it extremely robust even under the most severe conditions.

### EPOXY COATING:

The epoxy coating on all **ORBINOX** cast iron and carbon steel valve bodies and components is electrostatically applied making the valves to be corrosion resistant with a high quality finished surface.  
The **ORBINOX** standard colour is RAL-5015 **blue**.

### GATE SAFETY PROTECTION:

**ORBINOX** automated valves are provided with gate guards in accordance with EU Safety Standards.  
The design feature prevents any objects from being caught accidentally while the gate is moving.

## OTHER OPTIONS

### Bonnet (Fig.1):

Assures tight sealing to atmosphere for using with hazardous gas or fluids.

Reduces packing maintenance.

### V-port:

60 degree and pentagonal port design.

Selection depends on type of fluid control desired.

### Flush ports (Fig.2):

Allow for cleaning of solids trapped within the body cavities that can obstruct the flow or prevent the valve from closing.

Purging can be made with air, steam, liquids, etc. depending on the process.

### Other materials of construction:

Special alloys such as AISI 317, 254SMO, Hastelloys, Titanium, etc.

### Fabricated valves:

**ORBINOX** is equipped for in house fabrication of special valves. Depending on the design, diameter, pressures, construction material, etc.

### EXT (full lug design):

Modified version of the EX model with full lug design for end of line applications.

Standard flange connection from DIN PN 10, ANSI 150, to AS "D".

Sizes available up to DN 600.

Fig.1

## SURFACE TREATMENTS

Valve components can be protected or coated for a longer life expectancy, depending on the application and the service conditions.

At **ORBINOX** we can offer treatments and coatings for the valve components to improve the properties against **abrasion** (Stellite, Polyurethane...), **corrosion** (Halar, Rilsan, Galvanised...) and **adherence** (Polishing, PTFE...).

Fig.2

We recommend consultation with our technical department.

## ACTUATOR TYPES

### Manual:

Handwheel (rising & non-rising stem)  
Chainwheel  
Lever  
Bevel Gear  
Other (square nut...)

### Automatic:

Electric  
Pneumatic  
Hydraulic

All actuators supplied by ORBINOX are interchangeable.

### Accessories:

Mechanical Stops  
Actuator manual override  
Positioners  
Proximity Switches  
Stem extensions

Locking device  
Solenoid valves  
Limit Switches  
Floor stands

Wide range of valve extensions available.

Please consult our technical department.

**Standard Handwheel (Rising Stem)**   **Handwheel (Non Rising Stem)**

**Pneumatic Cylinder**

**Electric**

**Lever**

## TEMPERATURE CHART

SEAT / SEALS			PACKING		
Material	Max.Temp.(°C)	Applications	Material	Max. Temp. (°C)	pH
Metal/Metal	>250	High temp. Low tightness.	Tallowed cotton (AH)	50	6 - 8
EPDM (E)	120	Acids and non mineral oils.	Dry cotton (AS)	50	6 - 8
Nitrile (N)	120	Resistance to petroleum products.	PTFE impregn. synth. fibre (ST)	240	2 - 13
Viton (V)	200	General chemical service. High temperature.	Braided PTFE (TH)	260	0 - 14
Silicone (S)	250	Food service. / High temperature.	Graphited (GR)	600	0 - 14
PTFE (T)	250	Corrosion resistance.	Ceramic fibre (FC)	1200	—

More details and other materials under request.

NOTE: all types include an elastomere O-ring (same material as seal), excluding TH, GR and FC.

## SEAT TYPES

**METAL / METAL**

For applications with:

- High temperature
- High density media application
- When full tightness is not required

**RESILIENT, TYPE "A"**

- Standard resilient seat.
- Temperature limitations according to seat material selected. Consult the above chart or our technical department for more information.
- Replaceable seat retainer ring.

**TYPE "B" SEAT (metal/metal)**

For applications with:

- High temperature
- High density media application
- When full tightness is not required
- Replaceable design without dismantling the valve

**TYPE "B" SEAT (resilient)**

- Temperature limitations according to seat material selected. Consult the above chart or our technical department for more information.
- Replaceable and reinforced seat ring available in different materials such as: stainless steel, CA15, Ni Hard,...

**DEFLECTION CONE "C"**

- Deflects the media away from any internal exposed parts of the valve such as gate guides, seat, etc.
- Different types of material available such as AISI 316 stainless, CA15, Ni-Hard, etc.

Face to face dimension increase:

DN 50 to DN 250 X = 9mm

DN 300 to DN 600 X = 12mm

Larger diameters on request.

## VALVE EXTENSIONS

The extension on a valve allows the operator to open or close the valve from a distance. Different types of extensions can be used depending on the application and the distance from the gate to the actuator.

### 1.- Floor stand.

Mainly used to facilitate the operator in opening and closing the valve at normal operating level.

Required dimensions:

**H1:** distance from centre line of the pipe to the base of the floor.

**d1:** (wall bracket) distance from the wall to the face of the connecting flange.

#### Notes:

**a-** Any type of actuator can be mounted on the floor stand such as Handwheel, Gear, Electric, etc.

**b-** A wall bracket (detail A) is recommended at every 1.5m. This prevents any deviation or buckling of the extension rod.

**c-** Standard construction of the floor stand is cast iron or carbon steel. Other materials are available on request. (Fig. 1)

**d-** A position indicator (optional) can be installed for easy visibility of the percentage of opening of the valve.

**e-** Possibility of construction of floor stand supports. (Fig. 2)

Fig. 1

Detail A.

Fig. 2

### STANDARD PARTS LIST

Part:	Material:
Spindle	AISI 303
Stem	AISI 304
Wall bracket	Carbon Steel - Epoxy coated
Slider/bushing	Nylon
Floor stand	Cast Iron - Epoxy coated

## 2.- Tube

- Stem and yoke assembly remains in its original position.
- Handwheel is replaced by a tube, which rotates when operating the valve.
- Stem rises and lowers within the tube.
- Ideal for surface box operation, valve can be operated with a T-bar and a square nut.
- Required dimensions:

**H1:** distance from centre line of the pipe to the base of the floor.

**d1:** (wall bracket) distance from the wall to the face of the connecting flange.

### Notes:

1. Handwheel or square nut operated only.
2. A wall bracket (detail A) is recommended at every 1.5m. This prevents any deviation or buckling of the extension rod.
3. Standard construction of the extension is carbon steel epoxy coated. Other materials are available on request.

## 3 - Universal joint

- Universal joints are installed between the rod extensions where a straight alignment is not available. Please contact our technical department for more information.

## 4 - Extended support plates

- Ideal where long extensions are not required.
- Guide bearing is installed at the mid point to prevent any deflection of the rod.

Please consult our technical department.

## HANDWHEEL (rising stem)

- Standard handwheel actuator.
- Consists on:
  - Handwheel: Epoxy coated Cast Iron
  - Stem
  - Stem nut
  - Stem protector
- Available from DN 50 to DN 1000
- Options:
  - Locking Device
  - Extensions

## HANDWHEEL (non-rising stem)

- Recommended for installation where space is limited.

- Consists on:

- Handwheel: Epoxy coated Cast Iron
- Stem
- Yoke bushing
- Stem nut fixed to the gate

- Available from DN 50 to DN 1000

- Options:

- Locking Device
- Extension
- Square Nut Drive

## CHAINWHEEL

- Recommended for elevated installations.
- Consists on:
  - Chainwheel: Epoxy coated Cast Iron
  - Stem
  - Stem nut
  - Stem protector
- Available from DN 50 to DN 600
- Options (on request):
  - Locking Device
  - Extension
  - Non-rising Stem

## LEVER

- Recommended for quick opening and closing.

- Consists on:

- Lever
- Stem
- Yoke sleeve
- Lever lock

- Available from DN 50 to DN 300

DN	A	B	C	D	E	F	G	H	I
50	40	119	100	105	129	256	150	408	315

## GEAR

- Recommended for valves larger than DN 350 and working pressures greater than 3.5 kg/cm<sup>2</sup>
- Consists on:
  - Stem
  - Yoke
  - Bevel Gear Actuator with Handwheel (Standard Ratio 4:1)
- Available from DN 200 to DN1200
- Options:
  - Locking device
  - Extension
  - Chainwheel
  - Non-rising stem

## PNEUMATIC CYLINDER

- The standard pneumatic actuator (double acting on-off cylinder) consists on:
  - Aluminium jacket and covers
  - Stainless steel (AISI 304) piston rod
  - Nitrile coated steel piston
- Available from DN 50 to DN 1000
- Supply Pressure: minimum 3.5 kg/cm<sup>2</sup> - maximum 10 kg/cm<sup>2</sup>
- For valves installed in a horizontal position, we recommend U-type support plates and/or actuator support.
- Options:
  - Hard anodized jacket and covers
  - Over / Undersized cylinder
  - Stainless steel jacket and covers
  - Manual override
  - Fail safe system (Page EX-14)
  - Travel stops
- Instrumentation (on request):
  - Positioners
  - Solenoid valves
  - Flow regulators
  - Air preparation units

## FAIL SAFE SYSTEM

### SINGLE ACTING / SPRING RETURN

- This actuator (single acting cylinder) consists on:
  - Aluminium jacket and covers
  - Ductile Iron or carbon steel spring cap
  - Steel spring
  - Stainless Steel (AISI 304) piston rod
  - Nitrile coated steel piston
- Available from DN 50 to DN 200
- Supply pressure: minimum 5 kg/cm<sup>2</sup> - maximum 10 kg/cm<sup>2</sup>
- Options:
  - Fail open
  - Fail close

### SINGLE ACTING / VOLUME TANK

- For size DN250 and bigger safety system consists on: double acting pneumatic cylinder, volume tank and all the necessary elements according to the available options (solenoid valve, spool valve,...)
- Available for all diameters
- Supply Pressure: Minimum 3.5kg/cm<sup>2</sup>  
Maximum 10 kg/cm<sup>2</sup>
- Options:
  - 1- Pneumatic Failsafe
  - 2- Pneumatic or Electric Failsafe
- Option 2:

## ELECTRIC ACTUATOR

- Consists on:
  - Electric actuator
  - Rising stem
  - Motor support yoke flange  
(Acc. to ISO 5210 / DIN 3338)
- The standard electric motor is equipped with:
  - Manual emergency operation
  - Limit switches (open/closed)
  - Torque switches
- Available from DN 50 to DN 1200
- Wide range of types and marks available to meet customer's needs.
- Option:
  - Non rising stem
