

31100

Butterfly valve of carbon steel DN 80 - 600

26.04.2006

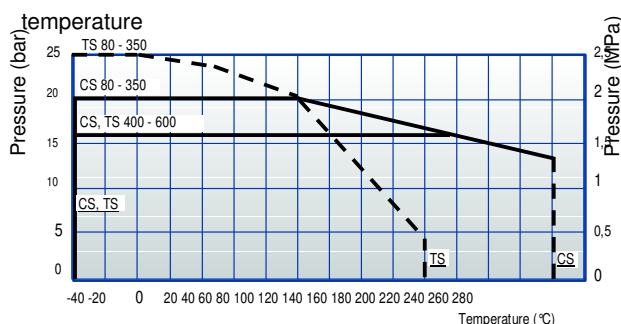

Operation

Butterfly valve 31100 is used in industrial pipelines for demanding on-off and regulating tasks as well as in district heating. It is tight to both directions of flow.

Nominal pressure	PN 25
Closing pressure difference	CS 20 bar DN 80 - 350
	TS 25 bar DN 80 - 350
	CS, TS 16 bar DN 400 - 600
Disc seal alternatives	AISI 316, PTFE+C
Temperature and tightness class	
AISI 316	max +260 °C/ min -40 °C
	ISO5208, EN 12266-1 RATE B
PTFE+C	max +180 °C/ min -40 °C
	ISO5208, EN 12266-1 RATE A

The max pressure difference depends on the working

Construction

This wafer type butterfly valve is installed between flanges. The body material is cast carbon steel.

Double eccentric disc and shaft are stainless steel.

The shaft packing box is a combination of graphite rings and O-rings which are possible to tighten while in pipeline and are also replaceable.

Face-to-face length according to ISO 5752, EN 558-1 series 20 DIN 3202 K1

Connection: Between flanges DIN2501 PN25, PN16, PN10, ANSI CLASS 150

Conform with the requirements of the Council Directive 97/23/EC on Pressure Equipment, marking:

Class: Gas, group 1

Nominal dimensions: DN 80 - 600

Product codes:

31100CS	metal seated
31102TS	teflon seated

311.. with handlever up to DN150

311.._Z with bare shaft

311.._M with manual gear

For steam on special order. Code number: 31101CS

max 8 bar/ 170 °C

Materials

Body:	Cast carbon steel GP240GH/ WCB
Disc:	Stainless steel EN10213-4 1.4408, ASTM A351 CF8M
Shaft:	Stainless steel EN10088-3 1.4460
Disc seal:	Stainless steel AISI 316/ PTFE+C
Shaft seal:	Graphite/ FPM O-Ring

*) with manual gear

Operation

The butterfly valve is delivered with handlever, manual gear, electric, pneumatic or hydraulic actuator according to customer's needs.

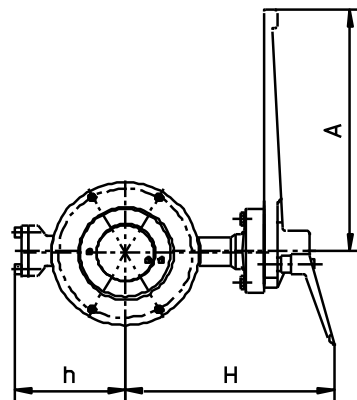

Handlever

The smaller sizes, DN 80 -150 can be operated with handlever.

The opening and closing of valves is stepless.

The valve is open when the handlever is parallel to the pipe.

DN	h	H	A
80	114	223	300
100	131	246	300
125	143	260	300
150	160	289	420

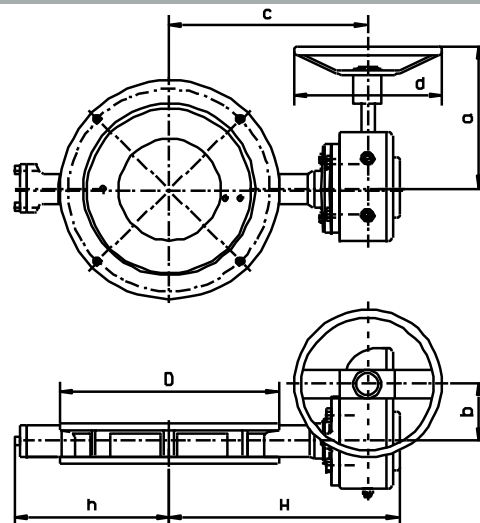

Manual gear

Opening and closing of the valves from the handwheel.

The position of disc can be seen on a position indicator on top of the gear.

The control curves

The curves indicate the regulating values of the valve at different opening angles.

WATER:

Volume flow:

$$Q = K_V \sqrt{\frac{\Delta p}{\rho}}$$

Flow velocity:

$$v = 354 \frac{Q}{DN^2}$$
